DETAILED ACTION

1. This communication is responsive to the response dated 12/21/2005.

Allowable Subject Matter

2. **Claims 1-19 are allowed.**

The present invention is directed to a communication device for use behind the ear. The closest prior art (U.S. Pat. – 6,721,433) shows a similar structured communication device, comprising: a housing having a first section (13) and a second section (15), and a sound delivery tube (17) coupled to the second section of the housing as claimed. But the prior art fails to teach that **the second section of the housing rotates with respect to the first section of the housing within a prescribed range of angular displacement as to allow user-definable depth adjustability of at least a portion of the sound delivery tube into an ear canal** as claimed. Those distinct features have been included to the sole independent claims and render the application to be allowable.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment on the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance”.
4. Any response to this final action should be mailed to:

**Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450**
